Traffic/weather has been a big help having it on my XM radio. I am able to hear traffic when I am commuting to and from school and work in San Francisco and Redwood City. Every since traffic/weather has been on my XM radio I have been able to make it to school and work on time and not have to deal with traffic when there are accidents on major freeways. The traffic has allowed me to avoid those situations and that has helped me out a lot!! Also the weather has been great for me, very useful when I am driving and need to know the weather in another city that I am driving to. Very convenient to have the weather station on satellite radio and allows me to be up to date with the weather especially in the winter time when it comes time to driving to Tahoe or other snowy places where I need to know if I need to put my chains on or stop in another city to wait out the snow. Thank you for your time and concerns with keeping the weather/traffic on satellite radio
